

# ALAN PAUL JOHN

Software Engineer || Full Stack Developer

alanpauljohn385@gmail.com | 9633022631 | linkedin.com/in/alan-paul-john | github.com/alan123-source | portfolio-inky-chi-pjby3xxcy9.vercel.app

## PROFILE SUMMARY

Computer Science undergraduate graduating in 2027 with a strong foundation in Data Structures and Algorithms and hands-on experience in full-stack web development using React, Node.js, Express.js, and MongoDB. Built and deployed full-stack applications with authentication, REST APIs, database integration, testing, and Docker. Strong interest in software engineering and backend development, seeking a Tech Fresher opportunity to apply problem-solving and software development skills in a professional environment.

## SKILLS

**Hard Skills:** JavaScript | Python | Embedded C | React | Node.js | Express.js | MongoDB | SQL | REST APIs | Docker | Git/GitHub

**Soft Skills:** Team Leadership | Communication | Problem Solving | Time Management | Adaptability | Attention to Detail

## PROJECTS

**E-Commerce Platform with Personalized Product Recommendations** *React, Node.js, Express.js, MongoDB, Stripe, Docker*

- Developed and deployed a full-stack MERN e-commerce platform featuring authentication, shopping cart, wishlist, order management, reviews, and an admin dashboard.
- Implemented JWT-based authentication, coupon management, product recommendations, Stripe payment integration, and email notifications.
- Documented APIs using Swagger, tested backend services with Jest, and deployed using Render, Vercel, Docker, and MongoDB Atlas.

**Automatic Air Quality Monitoring and Ventilation System (IoT)** *NodeMCU, MQ-135 Gas Sensor, Embedded C*

- Developed an IoT system using NodeMCU and MQ-135 gas sensors for real-time air quality monitoring.
- Implemented digital-value-based logic to automate ventilation control.
- Led team development and contributed to project documentation using LaTeX.

## LEADERSHIP & RESPONSIBILITIES

**Chief FOSS Ambassador** *Current*

**Vice Chair — FOSS Club** *3rd Year*

- Contributed to the planning and execution of club initiatives.

**Team Lead — Mini Project (IoT Air Quality Monitoring System)**

- Led a team to design and develop an IoT-based air quality monitoring and ventilation system.
- Managed task distribution and coordination, ensuring timely completion of the project.
- Contributed to project documentation and report preparation using LaTeX.

## EDUCATION

**Bachelor of Technology in Computer Science** *2023 – Present*

College of Engineering Poonjar, APJ Abdul Kalam Technological University (KTU)

CGPA: 7.05
